*If an Expiration Date is required by the brand or retail store a Stability Study must be started.

All Printed Materials and/or Components require 10% overage;
Email: RD@enovascience.com Inbound list prior to delivery to Enova Science.
Ship to: 4740 S. Cleveland Ave Fort Myers Florida 33907
All Printed Material must be reviewed by Enova Science before printing to ensure Label-Formula accuracy.

Label Review or suggested label information
The label information panel (the panel) is provided to the brand owner for the sole use of the brand owner and shall not be publicly disseminated. The Information contained in the panel is presented to the brand owner on an 'as-is' basis, with no representations or warranties expressed, or implied. The information in the panel shall be considered as an opinion only, with no guarantee to completeness, possibility of error, or omission of information. Enova Science shall not be held liable for losses incurred from the use of the information in the panel. Enova Science is not responsible for copy and claims on label. Label review with suggested edits will be submitted to the client. It will include a mandatory requirement that a label revision number is placed on the label in a specified location.
Enova Science recommends that brand owners have all labels and label claims reviewed by a 3rd party FDA Compliance consultant or attorney prior to printing.

Client to determine merchant processor packaging requirements including but not limited to QR Codes and UPC barcodes. All QR and UPC codes must be included with the label graphics before the time of review.

Customer supplied materials
Production run will not be scheduled until all materials needed are received. In the event that the customer changes the specification of the Product (Raw Materials or Components) after PO is accepted, or production is delayed due to materials not being delivered in time and/or in unusable condition, Enova Science reserves the right to charge up to $5,000 plus cost of materials affected by the change.

Enova Science requires 10% overage on all customer supplied material (Labels, Components and Raw Materials).
Production quantities are theoretical and the final production yield will complete the sales orders. Industry standard overages are +/- 10%.
Enova Science Reserves the right to reject any customer Supplied Components if it doesn't comply with internal specification and compliance.
